[5] PYRO

20 mA total

Pyrochannel 0

Pyrochannel 2

Pyrochannel 4

Pyrochannel 1

Pyrochannel 3

Pyrochannel 5

Pyrochannel Continuity Sensing

Plug this with an XT60 short circuit cap in order to enable active stabilization.
If at launch you are not confident in active stabilization (or believe something went wrong), please make sure to take out the short circuit cap and disable it entirely, so that your rocket can at least take off without systems that are known to be defective actively operating. Servo Power
